Stainless Steel Rotors and Gearboxes

Available with Antimocrobial Brushes

Bird Scrubber BS-6 and BS-8
Designed for picking and evisceration lines in chicken and turkey plants. Designed with simple adjustments and low maintenance costs in mind, the scrubbers are available in different lengths and brush configurations. When these Bird Scrubbers are added on the picking line, they are extremely effective in removing fecal material and debris from the bird before entering scalder, thereby helping to reduce the bacteria load in the scalder. When used on an evisceration line with anti-microbial brushes scrubbing the bird, they also aid in further removing fecal and other contaminants.

Specifications:

Brushes	BS-6 has 3 brushes/side; BS-8 has 4 brushes/side
Motor size	Two – 1 hp, 230/460V 60hz
Connection size	1/2" NPT female
Water Volume	30 gpm at 60PSI
Spray jets	26 – 5010 stainless steel
Weight	600lbs
