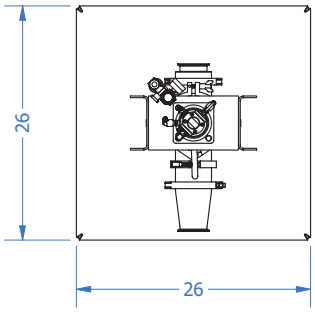
Giblet Pump

- Stainless steel construction
- Integral controls on air cylinder
- Pumps hearts, livers, gizzards, and necks
- Includes flapper-style check valve

Giblet Pump

Technical Advantages



Giblet Pump

Our Giblet Pumps are engineered with a flapper-type check valve for giblet processing. They can be used in existing systems or as part of a complete system.

Product Pumping Capacity for heart, livers, and necks ranges between 9,000 – 10,000 and for necks 6,000 – 7000.

Specifications:

- Air Pressure 75-100 psi
- Air Volume 0.5 – 1.5 CFM
- Water 2-3 GPM – 3" Sanitary connection
